The Light of Knowledge Jun 28 2022 Since the early 1990s hundreds of thousands of Tamil villagers in southern India have participated in literacy lessons, science demonstrations, and other events designed to transform them into active citizens with access to state power. These efforts to spread enlightenment among the oppressed are part of a movement known as the Arivoli Iyakkam (the Enlightenment Movement), considered to be among the most successful mass literacy movements in recent history. In *The Light of Knowledge*, Francis Cody's ethnography of the Arivoli Iyakkam highlights the paradoxes inherent in such movements that seek to emancipate people through literacy when literacy is a power-laden social practice in its own right. *The Light of Knowledge* is set primarily in the rural district of Pudukkottai in Tamil Nadu, and it is about activism among laboring women from marginalized castes who have been particularly active as learners and volunteers in the movement. In their endeavors to remake the Tamil countryside through literacy activism, workers in the movement found that their own understanding of the politics of writing and Enlightenment was often transformed as they encountered vastly different notions of language and imaginations of social order. Indeed, while activists of the movement successfully mobilized large numbers of rural women, they did so through logics that often pushed against the very Enlightenment rationality they hoped to foster. Offering a rare behind-the-scenes look at an increasingly important area of social and political activism, *The Light of Knowledge* brings tools of linguistic anthropology to engage with critical social theories of the postcolonial state.

Theoretical Computer Science and Discrete Mathematics Mar 02 2020 This volume constitutes the refereed post-conference proceedings of the International Conference on Theoretical Computer Science and Discrete Mathematics, held in Krishnankoil, India, in December 2016. The 57 revised full papers were carefully reviewed and selected from 210 submissions. The papers cover a broad range of topics such as line graphs and its generalizations, large graphs of given degree and diameter, graphoidal covers, adjacency spectrum, distance spectrum, b-coloring, separation dimension of graphs and hypergraphs, domination in graphs, graph labeling problems, subsequences of words and Parike matrices, lambda-design conjecture, graph algorithms and interference model for wireless sensor networks.

Triple Cross Dec 23 2021 1. Raksha The Gokulpet police finds the body of a gangster named Bhadra in his own tempo van with multiple stab wounds. They initially believe it to be a gangland killing. Senior Inspector Jacob Janardhanan realizes that someone is misleading the investigators to protect the real killer. He delves deep into the life of the victim and realizes that everyone who Bhadra came across during his short unsavoury life has some reason to kill him. 2. Chikna The South Chennai cops receive an anonymous phone call that a car has crashed in the east-coast road. They find the body of a prosperous and popular businessman named Radheyshyam, who had relocated to Chennai twenty years ago. On gut instinct, Inspector Jacob's unearths a story that takes the readers down an incredible path of avarice, intrigue, and vicious cunning. 3. The Final Orbit The car of a reclusive Indore businessman Boopathi is found parked in a mango grove in Gwalior. Bhoopathi, an orphan who hailed from Gokulpet, has vanished in thin air. Senior Inspector Jacob Janardhanan finds the orphanage that brought up Bhoopathi. He then unravels the strange travails of a gifted young man through the murky waters of the Chennai underworld.

Black and White Apr 26 2022 Puva invites you to take a peek into her life through her 26 poems in her second collection of poems.

Graphs, Combinatorics, Algorithms and Applications Aug 19 2021 Graphs, Combinatorics, Algorithms and Applications: The research papers contributed by leading experts in their respective field discusses current areas of research in graph theory such as: Graphoidal covers Hyper graphs Domination in graph Signed graphs Graph labelings and Theoretical computer science This volume will serve as an excellent reference for experts and research scholars working in Graph Theory and related topics.

Handbook of Graph Theory, Combinatorial Optimization, and Algorithms Jan 30 2020 The fusion between graph theory and combinatorial optimization has led to theoretically profound and practically useful algorithms, yet there is no book that currently covers both areas together. Handbook of Graph Theory, Combinatorial Optimization, and Algorithms is the first to present a unified, comprehensive treatment of both graph theory and c

1000 Sauces, Dips and Dressings Dec 03 2022 Presents recipes for a variety of sauces, dips, and dressings to serve with meats, fish, salads, vegetables, appetizers, and desserts.

Women Chefs of New York Oct 09 2020 Women Chefs of New York is a colorful showcase of twenty-five leading female culinary talents in the restaurant capital of the world. In a fiercely competitive, male-dominated field, these women have risen to the top, and their stories--and their recipes--make it abundantly clear why. Food writer Nadia Arumugam braves the sharp knives and the sputtering pans of oil for intimate interviews, revealing the chefs' habits, quirks, food likes, and dislikes, their proudest achievements, and their aspirations. Each chef contributes four signature

recipes--appetizers, entrees, and desserts--to recreate the experience of a meal from their celebrated kitchens. This gorgeous full-color cookbook includes portraits of these inspiring women, inviting interior shots of their restaurants, and mouthwatering pictures of the featured dishes, styled by the chefs themselves--all captured by celebrated food photographer Alice Gao. *Women Chefs of New York* features all-stars such as Amanda Freitag, Jody Williams, April Bloomfield (*The Spotted Pig*, *The Breslin*), Gabrielle Hamilton (*Prune*), Christina Tosi (*Momofuku Milk Bar*), and Alex Rajj (*La Vara*, *Txikito*, *El Quinto*) as well as up-and-coming players like Zahra Tangorra (*Brucie*), Ann Redding (*Uncle Boons*), and Sawako Ockochi (*Shalom Japan*). It's the ultimate gift for any cook or foodie--man or woman--interested in the food that's dazzling discerning palates in NYC now.

Stabilization, Safety, and Security of Distributed Systems Apr 02 2020 This book constitutes the refereed proceedings of the 12th International Symposium on Stabilization, Safety, and Security of Distributed Systems, SSS 2010, held in New York, USA, in September 2010. The 39 revised full papers were carefully reviewed and selected from 90 submissions. The papers address all safety and security-related aspects of self-stabilizing systems in various areas. The most topics related to self-* systems. The tracks were: self-stabilization; self-organization; ad-hoc, sensor, and dynamic networks; peer to peer; fault-tolerance and dependable systems; safety and verification; swarm, amorphous, spatial, and complex systems; security; cryptography, and discrete distributed algorithms.

The Scalpel Writes Dec 31 2019 Abel Arumugam has been a General Surgeon for about 40 years, working in and around Malaysia. In this book he has chronicled his life's journey in different chapters. It tells of his failures and successes with honesty and candour. It has been a labour of love that he hopes you will enjoy reading. Reviews: "Dr. Arumugam's scalpel is indeed sharp, but not as sharp as his wit, and unlike the unforgiving finality of a surgical "slice", his slice of humour brings chuckles always, guffaws sometimes, and rarely death threats from the Subject of his jokes. But then..... he has the scalpel for his defence!" Prof Alka Sinha Ganesh Professor of Medicine Christian Medical College, Vellore, India Reading Abel Arumugam's personal journey in 'The Scalpel Writes', one is reminded of Dorothy Springs's quotation " Life is like a camera - just focus on what's important, capture the good times, develop from negatives and if things don't work out just take another shot". Abel is jovial, carefree and fun loving and his focus in life is his family, numerous close friends and his surgical career. The 'snap shots' capture the good times in all these and his narratives are portrayed in fun, immense love and with enthusiasm. No mention of any negatives to develop from and he does not say what he did if things did not work out - I suppose, as usual, he just ordered another shot!! Dr Preman Jeyaratnam Consultant Anaesthetist Stoke on Trent United Kingdom

Hands-On Natural Language Processing with Python Nov 29 2019 Foster your NLP applications with the help of deep learning, NLTK, and TensorFlow Key Features Weave neural networks into linguistic applications across various platforms Perform NLP tasks and train its models using NLTK and TensorFlow Boost your NLP models with strong deep learning architectures

such as CNNs and RNNs Book Description Natural language processing (NLP) has found its application in various domains, such as web search, advertisements, and customer services, and with the help of deep learning, we can enhance its performances in these areas. Hands-On Natural Language Processing with Python teaches you how to leverage deep learning models for performing various NLP tasks, along with best practices in dealing with today's NLP challenges. To begin with, you will understand the core concepts of NLP and deep learning, such as Convolutional Neural Networks (CNNs), recurrent neural networks (RNNs), semantic embedding, Word2vec, and more. You will learn how to perform each and every task of NLP using neural networks, in which you will train and deploy neural networks in your NLP applications. You will get accustomed to using RNNs and CNNs in various application areas, such as text classification and sequence labeling, which are essential in the application of sentiment analysis, customer service chatbots, and anomaly detection. You will be equipped with practical knowledge in order to implement deep learning in your linguistic applications using Python's popular deep learning library, TensorFlow. By the end of this book, you will be well versed in building deep learning-backed NLP applications, along with overcoming NLP challenges with best practices developed by domain experts. What you will learn Implement semantic embedding of words to classify and find entities Convert words to vectors by training in order to perform arithmetic operations Train a deep learning model to detect classification of tweets and news Implement a question-answer model with search and RNN models Train models for various text classification datasets using CNN Implement WaveNet a deep generative model for producing a natural-sounding voice Convert voice-to-text and text-to-voice Train a model to convert speech-to-text using DeepSpeech Who this book is for Hands-on Natural Language Processing with Python is for you if you are a developer, machine learning or an NLP engineer who wants to build a deep learning application that leverages NLP techniques. This comprehensive guide is also useful for deep learning users who want to extend their deep learning skills in building NLP applications. All you need is the basics of machine learning and Python to enjoy the book.

Advances in Materials and Manufacturing Engineering Aug 07 2020 This book comprises selected papers from the Fourth International Conference on Materials and Manufacturing Engineering (ICMME 2019). The contents focus on the latest developments in the synthesis and characterization of new materials, and highlights the challenges involved in the manufacturing and machinability of different materials. Advanced and cost-effective manufacturing processes and their applications are also discussed in the book. In addition, it covers topics like robotics, fluid dynamics, design and development, and different optimization techniques. The contents of this book will be beneficial to students, researchers, and industry professionals.
