Educating Believers Dec 22 2021 *Educating Believers: Religion and School Choice* offers theoretical essays and empirical studies from leading researchers on religion and schooling. Religious authority and emphasis on fairness and caring provide consistent rules governing the stable family and community relationships needed for individual growth and collective action. Religion is among the most important aspects of human life, likely hard-wired into human beings, and intimately intertwined with schooling. The book addresses key matters regarding religious pluralism in education, including the history of state-faith relationships in schooling, how religious faith can motivate teachers, whether religious education teaches tolerance, and whether practices in Europe and Asia hold lessons for American schools. The works in this volume can guide future scholarship on religious pluralism in education, particularly work related to civic values, character formation and public policy. The chapters in this book were originally published in the *Journal of School Choice*.

[The Federalist Papers](#) Nov 01 2022 *The Federalist Papers* Alexander Hamilton - Hailed by Thomas Jefferson as the best commentary on the principles of government which was ever written, *The Federalist Papers* is a collection of eighty-five essays published by Founding Fathers Alexander Hamilton, James Madison, and John Jay from 1787 to 1788, as a means to persuade the public to ratify the Constitution of the United States. With nearly two-thirds of the essays written by Hamilton, this enduring classic is perfect for modern audiences passionate about his work or seeking a deeper understanding of one of the most important documents in US history.

Pluralism and American Public Education Jun 15 2021 This book argues that the structure of public education is a key factor in the failure of America's public education system to fulfill the intellectual, civic, and moral aims for which it was created. The book challenges the philosophical basis for the traditional common school model and defends the educational pluralism that most liberal democracies enjoy. Berner provides a unique theoretical pathway that is neither libertarian nor state-focused and a pragmatic pathway that avoids the winner-takes-all approach of many contemporary debates about education. For the first time in nearly one hundred fifty years, changing the underlying structure of America's public education system is both plausible and possible, and this book attempts to set out why and how.

Joothan Dec 10 2020 Omprakash Valmiki describes his life as an untouchable, or Dalit, in the newly independent India of the 1950s. "Joothan" refers to scraps of food left on a plate, destined for the garbage or animals. India's untouchables have been forced to accept and eat joothan for centuries, and the word encapsulates the pain, humiliation, and poverty of a community forced to live at the bottom of India's social pyramid. Although untouchability was abolished in 1949, Dalits continued to face discrimination, economic deprivation, violence, and ridicule. Valmiki shares his heroic struggle to survive a preordained life of perpetual physical and mental persecution and his transformation into a speaking subject under the influence of the great Dalit political leader, B. R. Ambedkar. A document of the long-silenced and long-denied sufferings of the Dalits, Joothan is a major contribution to the archives of Dalit history and a manifesto for the revolutionary transformation of society and human consciousness.

Uninformed Jul 05 2020 Research polls, media interviews, and everyday conversations reveal an unsettling truth: citizens, while well-meaning and even passionate about current affairs, appear to know very little about politics. Hundreds of surveys document vast numbers of citizens answering even basic questions about government incorrectly. Given this unfortunate state of affairs, it is not surprising that more knowledgeable people often deride the public for its ignorance. Some experts

even think that less informed citizens should stay out of politics altogether. As Arthur Lupia shows in *Uninformed*, this is not constructive. At root, critics of public ignorance fundamentally misunderstand the problem. Many experts believe that simply providing people with more facts will make them more competent voters. However, these experts fail to understand how most people learn, and hence don't really know what types of information are even relevant to voters. Feeding them information they don't find relevant does not address the problem. In other words, before educating the public, we need to educate the educators. Lupia offers not just a critique, though; he also has solutions. Drawing from a variety of areas of research on topics like attention span and political psychology, he shows how we can actually increase issue competence among voters in areas ranging from gun regulation to climate change. To attack the problem, he develops an arsenal of techniques to effectively convey to people information they actually care about. Citizens sometimes lack the knowledge that they need to make competent political choices, and it is undeniable that greater knowledge can improve decision making. But we need to understand that voters either don't care about or pay attention to much of the information that experts think is important. *Uninformed* provides the keys to improving political knowledge and civic competence: understanding what information is important to and knowing how to best convey it to them.

Civic Education in the Twenty-First Century May 27 2022 Imagine an America where governmental institutions, schools, new technologies, and interest groups work together to promote more informed citizens. Civic Education in the Twenty-First Century brings together the research of scholars from various disciplines to show that by expanding what is done in isolation, we can realize such a healthy civic ecology.

Opportunity and Hope Mar 13 2021 In *Opportunity and Hope*, prominent journalist Naomi Schaefer Riley chronicles the lives of 10 representative stories of how Children's Scholarship Fund alumni who—because of the educational opportunities afforded them—were able to turn less than perfect childhood circumstances into successful lives and careers. The stories of these children, now grown, and their families are nothing less than inspirational. They are proof that all any of America's children need to achieve their dreams is a chance, and someone to believe in them. They are also a testament to the power of private schools, including many inner-city faith-based schools, and they are proof that given the chance for the right kind of education, anyone can achieve the American dream no matter what or where they come from.

NL AIC AI For Business and Government Courseware May 03 2020 AI For Business and Government is a standard for all professionals. 'AI For Business and Government' is a certification that can be obtained after passing the corresponding exam. This can be best be achieved by participating in an AI For Business training course. This course is aimed at generic professionals working in business or government who do not necessarily have much experience with AI, or data or IT in general. However, they do want to understand what AI is, how it can benefit or affect their business environment and how they can leverage this to their advantage. Topics covered include the benefits of AI applications, data management for AI, building and assessing an AI application, ethics, risks and reliability, and organizational success factors for enabling humans and machines to work together. 'Where does Data Management end and AI application begin?' The subjects covered are enumerated below, and are addressed in the course from a management perspective: · 1. The applications and benefits of AI · 2. Data, robots and definition of AI · 3. Predictions, algorithms, machine and deep learning · 4. Build and review an AI application · 5. Data management for AI · 6. Ethics and trustworthiness · 7. Organizational success factors for helping man and machine to work together · 8. The future of AI This certificate was established by the Netherlands AI Coalition (NL AIC) as a standard for professionals who want to use Artificial Intelligence (AI) in their work environment and managers who need to decide on the general application and/or use of AI. A professional will learn what AI could mean for an organization and how to organize, implement and execute it. As a result, the exam is very application-oriented.

Welcoming the Stranger Mar 01 2020 World Relief staffers Matthew Soerens and Jenny Yang move beyond the rhetoric to offer a Christian response to immigration. With careful historical understanding and thoughtful policy analysis, they debunk myths about immigration, show the limits of the current immigration system, and offer concrete ways for you to welcome and minister to your immigrant neighbors.

God, Schools, and Government Funding Jul 17 2021 In recent years, a conservative majority of the U.S. Supreme Court, over vigorous dissents, has developed circumventions to the Establishment Clause of the First Amendment that allow state legislatures unabashedly to use public tax dollars increasingly to aid private elementary and secondary education. This expansive and innovative legislation provides considerable governmental funds to support parochial schools and other religiously-affiliated education providers. That political response to the perceived declining quality of traditional public schools and the vigorous school choice movement for alternative educational opportunities provokes passionate constitutional controversy. Yet, the Court's recent decision in *Arizona Christian School Tuition Organization v. Winn* inappropriately denies taxpayers recourse to challenge these proliferating tax funding schemes in federal courts. Professors Winer and Crimm clearly elucidate the complex and controversial policy, legal, and constitutional issues involved in using tax expenditures - mechanisms such as exclusions, deductions, and credits that economically function as government subsidies - to finance private, religious schooling. The authors argue that legislatures must take great care in structuring such programs and set forth various proposals to ameliorate the highly troubling dissention and divisiveness generated by state aid for religious education.

Teaching America Aug 30 2022 In *Teaching America*, more than 20 leading thinkers sound the alarm over a crisis in citizenship—and lay out a powerful agenda for reform. The book's unprecedented roster of authors includes Justice Sandra Day O'Connor, Senator Jon Kyl, Senator Bob Graham, Secretary Rod Paige, Alan Dershowitz, Juan Williams, Glenn Reynolds, Michael Kazin,

Frederick Hess, Andrew Rotherham, Mike Feinberg, Seth Andrew, Mark Bauerlein and more. Their message: To remain America, our country has to give its kids a civic identity, an understanding of our constitutional system, and some appreciation of the amazing achievements of American self-government. But we are failing. Young Americans know little about the Bill of Rights, the democratic process, or the civil rights movement. Three of every four high school seniors aren't proficient in civics, nine of ten can't cut it in U.S. history, and the problem is only aggravated by universities' disregard for civic education. Such civic illiteracy weakens our common culture, disenfranchises would-be voters, and helps poison our politics.

Making Civics Count Sep 06 2020 "By nearly every measure, Americans are less engaged in their communities and political activity than generations past." So write the editors of this volume, who survey the current practices and history of citizenship education in the United States. They argue that the current period of "creative destruction"—when schools are closing and opening in response to reform mandates—is an ideal time to take an in-depth look at how successful strategies and programs promote civic education and good citizenship. *Making Civics Count* offers research-based insights into what diverse students and teachers know and do as civic actors, and proposes a blueprint for civic education for a new generation that is both practical and visionary.

U.S. Citizenship and Naturalization Handbook Oct 20 2021

The Plot to Change America Feb 09 2021 *The Plot to Change America* exposes the myths that help identity politics perpetuate itself. This book reveals what has really happened, explains why it is urgent to change course, and offers a strategy to do so. Though we should not fool ourselves into thinking that it will be easy to eliminate identity politics, we should not overthink it, either. Identity politics relies on the creation of groups and then on giving people incentives to adhere to them. If we eliminate group making and the enticements, we can get rid of identity politics. The first myth that this book exposes is that identity politics is a grassroots movement, when from the beginning it has been, and continues to be, an elite project. For too long, we have lived with the fairy tale that America has organically grown into a nation gripped by victimhood and identitarian division; that it is all the result of legitimate demands by minorities for recognition or restitutions for past wrongs. The second myth is that identity politics is a response to the demographic change this country has undergone since immigration laws were radically changed in 1965. Another myth we are told is that to fight these changes is as depraved as it is futile, since by 2040, America will be a minority-majority country, anyway. This book helps to explain that none of these things are necessarily true.

Language, Immigration and Naturalization Nov 28 2019 This volume focuses on the everyday legalities and practicalities of naturalization including governmental processes, the language of citizenship tests and classes, the labelling and lived experiences of immigrants/outsideers and the media's interpretation of this process. The book brings together scholars from a wide range of specialities who accentuate language and raise issues that often remain unarticulated or masked in the media. The contributors highlight how governmental policies and practices affect native-born citizens and residents differently on the basis of legal status. Furthermore, the authors observe that many issues that are typically seen as affecting immigrants (such as language policies, nationalist identities and feelings of belonging) also impact first-generation native-born citizens who are seen as, or see themselves as, outsideers.
