[Shattered Bonds](#) Mar 07 2021 Shattered Bonds is a stirring account of a worsening American social crisis--the disproportionate representation of black children in the U.S. foster care system and its effects on black communities and the country as a whole. Tying the origins and impact of this disparity to racial injustice, Dorothy Roberts contends that child-welfare policy reflects a political choice to address startling rates of black child poverty by punishing parents instead of tackling poverty's societal roots. Using conversations with mothers battling the Chicago child-welfare system for custody of their children, along with national data, Roberts levels a powerful indictment of racial disparities in foster care and tells a moving story of the women and children who earn our respect in their fight to keep their families intact.

Talking Points: Transgender Dec 24 2019 How Christians can think biblically, act wisely, and relate lovingly over transgender issues. There's been huge cultural change in the last few decades. Vaughan Roberts surveys the Christian worldview and seeks to apply these principles to the many complex questions surrounding gender identity. Talking Points is a series of short books by Vaughan Roberts, designed to help Christians think, talk and relate to others with compassion, conviction and wisdom about today's big issues.

Along with containing an analysis and excerpts of court decisions, the book

The book also includes readings not only from cases but congressional floor debates, committee reports, committee hearings, presidential vetoes and other statements, state actions, Federalist papers, and professional journals, and it also adds a substantially revised chapter on equal protection that addresses immigration law and the rights of aliens.

Fatal Invention Jun 10 2021 An incisive, groundbreaking book that examines how a biological concept of race is a myth that promotes inequality in a supposedly "post-racial" era. Though the Human Genome Project proved that human beings are not naturally divided by race, the emerging fields of personalized medicine, reproductive technologies, genetic genealogy, and DNA databanks are attempting to resuscitate race as a biological category written in our genes. This groundbreaking book by legal scholar and social critic Dorothy Roberts examines how the myth of race as a biological concept—revived by purportedly cutting-edge science, race-specific drugs, genetic testing, and DNA databases—continues to undermine a just society and promote inequality in a supposedly "post-racial" era. Named one of the ten best black nonfiction books 2011 by AFRO.com, Fatal Invention offers a timely and "provocative analysis" (Nature) of race, science, and politics that "is consistently lucid . . . alarming but not alarmist, controversial but evidential, impassioned but rational" (Publishers Weekly, starred review). "Everyone concerned about social justice in America should read this powerful book." —Anthony D. Romero, executive director, American Civil Liberties Union "A terribly important book on how the 'fatal invention' has terrifying effects in the post-genomic, 'post-racial' era." —Eduardo Bonilla-Silva, professor of sociology, Duke University, and author of Racism Without Racists: Color-Blind Racism and the Persistence of Racial Inequality in the United States "Fatal Invention is a triumph! Race has always been an ill-defined amalgam of medical and cultural bias, thinly overlaid with the trappings of contemporary scientific thought. And no one has peeled back the layers of assumption and deception as lucidly as Dorothy Roberts." —Harriet A. Washington, author of and Deadly Monopolies: The Shocking Corporate Takeover of Life Itself

Killing the Black Body Apr 20 2022 Killing the Black Body remains a rallying cry for education, awareness, and action on extending reproductive justice to all women. It is as crucial as ever, even two decades after its original publication. "A must-read for all those who claim to care about racial and gender justice in America." —Michelle Alexander, author of The New Jim Crow In 1997, this groundbreaking book made a powerful entrance into the national conversation on race. In a media landscape dominated by racially biased images of welfare queens and crack babies, Killing the Black Body exposed America's systemic abuse of Black women's bodies. From slave masters' economic stake in bonded women's fertility to government programs that coerced thousands of poor Black women into being sterilized as late as the 1970s, these abuses pointed to the degradation of Black motherhood—and the exclusion of Black women's reproductive needs in mainstream feminist and civil rights agendas. "Compelling. . . . Deftly shows how distorted and racist constructions of black motherhood have affected politics, law, and policy in the United States." —Ms.

I've Been Here All the While Sep 13 2021 Perhaps no other symbol has more resonance in African American history than that of "40 acres and a mule"—the lost promise of Black reparations for slavery after the Civil War. In I've Been Here All the While, we meet the Black people who actually received this mythic 40 acres, the American settlers who coveted this land, and the Native Americans whose holdings it originated from. In nineteenth-century Indian Territory (modern-day Oklahoma), a story unfolds that ties African American and Native American history tightly together, revealing a western theatre of Civil War and Reconstruction, in which Cherokee, Choctaw, Chickasaw, Creek, and Seminole Indians, their Black slaves, and African Americans and whites from the eastern United States fought military and rhetorical battles to lay claim to land that had been taken from others. Through chapters that chart cycles of dispossession, land seizure, and settlement in Indian Territory, Alaina E. Roberts draws on archival research and family history to upend the traditional story of Reconstruction. She connects debates about Black freedom and Native American citizenship to westward expansion onto Native land. As Black, white, and Native people constructed ideas of race, belonging, and national identity, this part of the West became, for a short time, the last place where Black people could escape Jim Crow, finding land and exercising political rights, until Oklahoma statehood in 1907.

James B. Conant Sep 20 2019 James B. Conant (1893-1978) was one of the giants of the American establishment in the twentieth century. President of Harvard University from 1933 to 1953, he was also a scientist who led the US government's effort to develop weapons of mass destruction, and his story mirrors the transition of the United States from isolationism to global superpower at the dawn of the nuclear age. 'This splendid portrait of Conant ... illuminates the life of a pivotal figure in the making of US nuclear, scientific, educational, and foreign policy for almost half a century. But the book is much more: it is not only an insightful narration of Conant's life, it is also a brilliant and important account of the making of the nuclear age, a chronicle that contains much that is new.' The Washington Post 'The bomb would be as much Conant's as it was anyone's in government. His inner response to that burden of responsibility has long been obscured, but it is illumined here ... This is a model of historiography that is evocative reading.' The New York Times Book Review 'Vibrantly written and compelling, it breaches Conant's shield of public discretion in masterly fashion ...
