Built and maintained by an impressive network of thousands of developers throughout the world, the Debian project is cemented by its social contract. This foundation text defines the project's objective: fulfilling the needs of users with a 100% free operating system. The success of Debian and of its ecosystem of derivative distributions (with Ubuntu at the forefront) means that an increasing number of administrators are exposed to Debian's technologies. This Debian Administrator's Handbook, which has been entirely updated for Debian 8 "Jessie", builds on the success of its 6 previous editions. Accessible to all, this book teaches the essentials to anyone who wants to become an effective and independent Debian GNU/Linux administrator. It covers all the topics that a competent Linux administrator should master, from installation to updating the system, creating packages and compiling the kernel, but also monitoring, backup and migration, without forgetting advanced topics such as setting up SELinux or AppArmor to secure services, automated installations, or virtualization with Xen, KVM or LXC. This book is not only

designed for professional system administrators. A Manual of Ugaritic Nov 30 2019 Pierre Bordreuil and Dennis Pardee are two of the best-known scholars doing research on the language and texts of the ancient city of Ugarit (modern Tell Ras Shamra). This grammar was first published in French in 2004 in two volumes; and Eisenbrauns is pleased to make it available now in a corrected and updated version, in one volume, with significant enhancements. The book includes a historical introduction to the texts and language, the book includes a sketch of the grammar of Ugaritic, a bibliography, facsimiles (hand-copies) of a number of texts, and a glossary and text concordance—in short, everything that a student needs for entrée into the language. On the CD, in addition to the PDF, color photos of all of the texts included in the book are provided. The hyperlinks to the PDF enable the reader to move easily from the discussion in the grammar to a copy of a text to the color photo of the text and back again, making the material much more accessible and usable for students and researchers. Pierre Bordreuil inaugurated a chair in Ugaritic at the écoles des langues et civilisations orientales at the Institut catholique de Paris. Transnational Ruptures Mar 15 2021 A key development in international migration in recent years has been the increasing feminization of migrant populations. Research attention now focuses not only on the growing number of women on the move but also on their changing gender roles as more female migrants participate as principal wage earners and heads of household rather than as 'dependants'. The tensions between population displacement within and beyond Guatemala and the multiple local, regional and national realities encountered and reconfigured by these refugee and migrants allow a fascinating window onto the connections and ruptures experienced in a 'global/local world'. *Transnational Ruptures* holds great interest and value for a wide readership, from scholars who are interested in transnational and refugee studies and international migration, to upper level university students in disciplines such as human geography, anthropology, sociology, Latin American Studies, gender studies, political science and international studies.

System of National Accounts 2008 Jan 01 2020 This joint publication of the United Nations, the European Commission, the International Monetary Fund, the Organization for Economic Cooperation and Development, and the World Bank reflects the changes and improvements that have been introduced to the System of National Accounts since its most recent revision in 1993. The System of National Accounts 2008 (2008 SNA) is a statistical framework that provides a comprehensive, consistent and flexible set of macroeconomic accounts for policymaking, analysis and research purposes. The 2008 SNA is expected to receive distinguished attention not only from professionals practicing in the field of national accounts but policy makers, analysts, academia and a broad range of users who rely on macroeconomic information obtainable from the updated system of accounts. It also provides an overarching framework for standards in other domains of economic statistics, facilitating the integration of these statistical systems to achieve consistency with national accounts. The publication that contains the 2008 SNA has been substantially updated from its previous version as a result of a multiyear collaborative project. Annex 3 of the publication provides a detailed description of the new features of the 2008 SNA. The 2008 SNA will support the implementation of international standards in national accounting and provide the methodological basis for improving the international comparability of national accounts data. When adopting the 2008 SNA as the updated new standard of national accounting, the United Nations Statistical Commission encouraged all countries to compile and report their national accounts on the basis of the 2008 SNA as soon as possible. The publication also provides practical new tools to complement the previously published version: a glossary of SNA terms and definitions and a comprehensive index.
