This book presents Alexander H. Stephens, Vice President of the Confederacy, views on the constitutional reasons for the Civil War This book suggests that religion, in its usual sense, can be replaced by something better, that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the

universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can. The book breaks new ground in suggesting a radical alternative to religion. It offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions. It also challenges current views of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality. It develops and elaborates a notion of the 'noosphere' within a theoretical system, this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated, eccentric and rather mystical idea. Analyzing the way that recent works of graphic narrative use the comics form to engage with the "problem" of reproduction, Shiamin Kwa's Perfect Copies reminds us that the mode of production and the manner in which we perceive comics are often quite similar to the stories they tell. Perfect Copies considers the dual notions of reproduction, mechanical as well as biological, and explores how comics are works of reproduction that embed questions about the nature of reproduction itself. Through close readings of the comics My Favorite Thing Is Monsters by Emil Ferris, The Black Project by Gareth Brookes, The Generous Bosom series by Conor Stechschulte, Sabrina by Nick Drnaso,

and Panther by Brecht Evens, Perfect Copies shows how these comics makers push the limits of different ideas of “reproduction” in strikingly different ways. Kwa suggests that reading and thinking about books like these, that push us to engage with these complicated questions teaches us how to become better readers.
