This is the story of a music-obsessed boy's journey from his bedroom in Hitchin to the heart of nineties London just as Britpop is about to explode... From James Cook's early

encounters with pop's pioneers – Revolver heard for the first time, Led Zeppelin glimpsed on evening TV – through an adolescence in which friendships are forged on a mutual love for the Velvet Underground, to the high-stakes gamble of moving to the metropolis, the years between the assassination of John Lennon and Kurt Cobain's suicide are mapped in musical memories. Along the way, we explore the diverse influences that fuelled the nineties guitar pop boom, from John Barry to Bryan Ferry, and follow James as he forms a band with his twin brother and releases a critically acclaimed debut album. More than a memoir, *Memory Songs* stands as a testament to music's power over the imagination, the way it punctuates our past and shapes our future. Woven through with meditations on the artists who defined the UK's last legendary scene, it delivers a passionate analysis of the music that shaped a crucial moment in British cultural history. A "beautifully written and self-revealing" memoir of motherhood—in all its messy glory—as a spiritual practice, by a longtime yoga and dharma teacher (Tara Brach, author of *Radical Acceptance*) *Sutra* is the Sanskrit name for a short spiritual teaching, and it comes from the same root as the English word suture, or stitch. This story of motherhood as a path to awakening is, says yoga and meditation teacher Anne Cushman, "an homage to the long threads that run through all human lives, stitching up what's shredded in our hearts." The *Mama Sutra* spans an eighteen-year journey through motherhood as a spiritual practice, chronicling Cushman's first pregnancy, her daughter's tragic stillbirth, the joyful birth of her son, the

"home retreat" of early motherhood, the challenges of parenthood, the diagnosis and gifts of her son's developmental differences, the meltdown of her nuclear family and its reconfiguration into a new and joyful form, and more. This is a powerful story of the rawness and beauty of life. House Committee on Naval Affairs, Sixty-Eighth Congress, first session Committee Serial No. No. 81. During the first fifty years of the twentieth century, ham radio went from being an experiment to virtually an art form. Because of the few government restrictions and the low monetary investment required, the concept of ham radio appealed to various people. More than just a simple hobby, however, ham radio required its operators to understand radio theory, be able to trace a schematic and know how to build a transmitter and receiver with whatever material they might have available. With the advent of World War II and the increased need for cutting-edge communications, the United States government drew upon the knowledge and skill of these amateur ham radio operators. This book explores the history of ham radio operators, emphasizing their social history and their many contributions to the technological development of worldwide communications. It traces the concept of relays, including the American Radio Relay League, from contacts as close as 25 miles apart to operators anywhere in the world. The book highlights the part played by ham radio in many of the headline events of the half century, especially exploration and aviation "firsts". The ways in which these primarily amateur operators assisted in times of disaster including such events as the sinking of the

Titanic and the 1937 Ohio River flood, are also examined. Lean is a type of organizational change brought about through improvement methods based on cost reduction mechanism. The assumption is that by reducing costs, the organizations can work better and more efficiently. All changes in lean-based organizations are directed at reducing these costs by identifying and eliminating waste. The thinking is that cost reduction will increase efficiency since, basically, it removes process inefficiencies and decreases cycle time. Why are targets directed at cost reduction? Because costs are a crucial factor for sustainable business organization. Lean thinking cuts the value of scale production by looking at the existing waste in a process. Production remains the same, but the costs of goods production are reduced due to the elimination of waste in the process. As a result, companies do not have to increase their production if it is not required, giving companies an increase in average profits due to lean and the elimination of identified waste. The focus on cost reduction can be included in the overall lean concept since cost wasting is only a part of the existing waste. In other words, other waste can be converted into costs or perceived as a value. This book starts the mental process of organization change through lean thinking. It provides the background and history of lean, and then gets into how the lean process works. The author also discusses why an organization should implement lean as a method to increase quality and engage workers in the process, thereby increasing efficiency and, ultimately, profitability. Through case studies and examples from Indonesia, the

author describes how to create a value stream to identify waste and discusses the concept of a pull system and its impact on the process. From the headlines of today comes the ultimate adventure story of discovery. Two scientists unwittingly introduce a small tribe of prehistoric people living in isolation for a half million years to the ultimate modern predator: humanity. This is their adventure combining a clash of cultures, religious ardor with the oldest stories of all: the meaning of friendship and love. The two scientists, Sarah and Richard discover the existence of a living human ancestor, Homo floresiensis on an isolated tropical island. These small Hobbit-like creatures are not the Hobbits of JRR Tolkien's stories, but a small tribe of prehistoric people living in seeming isolation for nearly a half million years on the Indonesian island of Irmã Flores. In their unrelenting quest for knowledge, Sarah and Richard unintentionally expose these innocents to the onslaught of the modern world including corporate raiders, Indonesian pirates and religious zealots. In the process of discovery and befriending these ancient people, Sarah and Richard rediscover their own humanity and the opportunity to find true love. This as a rousing adventure book with serious undertones about our very definition of humanity, and how we treat the other sentient creatures that occupy our small planet. What is at the core of being human, and how are we systematically destroying those very same qualities that we hold so dear? NATIONAL BESTSELLER • At once an incredible adventure narrative and a penetrating biographical portrait—the bestselling author of *Destiny of*

the Republic brings us the true story of Theodore Roosevelt's harrowing exploration of one of the most dangerous rivers on earth. The River of Doubt—it is a black, uncharted tributary of the Amazon that snakes through one of the most treacherous jungles in the world. Indians armed with poison-tipped arrows haunt its shadows; piranhas glide through its waters; boulder-strewn rapids turn the river into a roiling cauldron. After his humiliating election defeat in 1912, Roosevelt set his sights on the most punishing physical challenge he could find, the first descent of an unmapped, rapids-choked tributary of the Amazon. Together with his son Kermit and Brazil's most famous explorer, Cândido Mariano da Silva Rondon, Roosevelt accomplished a feat so great that many at the time refused to believe it. In the process, he changed the map of the western hemisphere forever. Along the way, Roosevelt and his men faced an unbelievable series of hardships, losing their canoes and supplies to punishing whitewater rapids, and enduring starvation, Indian attack, disease, drowning, and a murder within their own ranks. Three men died, and Roosevelt was brought to the brink of suicide. The River of Doubt brings alive these extraordinary events in a powerful nonfiction narrative thriller that happens to feature one of the most famous Americans who ever lived. From the soaring beauty of the Amazon rain forest to the darkest night of Theodore Roosevelt's life, here is Candice Millard's dazzling debut. Originally published in hardcover in 2021 by Scribner. Popular Science gives our readers the information and tools to improve their technology and

their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. We are all risk takers. In life and in business, human attitudes towards risk are terrifyingly irrational. We hugely over-estimate short-term risks (standing near a cliff edge, or selling to someone who may not be credit worthy) but we under-estimate long-term risks (smoking, or acquiring a large company). This book seeks to understand risk from the human perspective. Why do we decide the things that we do, and how can we do it differently or better? This book should be required reading not just for students of business or economics, but for anyone faced with making important decisions. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Made up of members of the Coldstream and Scots Guards, British Yeomanry cavalry regiments, New Zealanders, South Africans, and Indian Army men, the Long Range Desert Group was perhaps the most effective of all the "special forces" established by the Allies during the Second World War. It was able to go thousands of miles into enemy territory, well-armed and carrying its own supplies of petrol, food and even water to last for weeks at a time - something quite new in military history. Using experience acquired in WWI and inter-war exploration travels, the LRDG thus developed the ability to appear almost

anywhere in the desert to carry out almost every type of ground reconnaissance mission possible in desert warfare, exploring and mapping the terrain, transporting agents behind enemy lines or determining the strength and location of enemy forces with an extraordinary degree of accuracy and detail and thus able to verify or hide Ultra intelligence. Equally important were their skills in the art of desert navigation, demonstrated in the outflanking of the enemy during the Allied advance from El Alamein westward to Tunisia, as led by the LRDG. Once it had teamed up with the Special Air Service (SAS), made up of British, Free French, Commonwealth and Jewish Palestinian soldiers, the LRDG perfected the art of irregular mechanized warfare conducted in the rear of the enemy's forces in the desert, attacking enemy installations of all kinds, mining roads, raiding airfields, destroying enemy aircraft on the ground and inflicting losses upon the enemy in inverse proportion to their own remarkably low rate of casualties. Through meticulous research in original archival material, this book thus tells the extraordinary story of how a relatively small number of dedicated men developed the methods and techniques for crossing by motor vehicle the depths of the then unmapped and seemingly impassable great deserts of Egypt and Libya, the Western Desert, during the British Army's North African Campaign of 1940-43. The Long Range Desert Group and the Special Air Service as a matter of course did extraordinary things - the heroic was the commonplace. Their tactics, techniques and remarkable success in desert warfare continue to make

them of great interest to the student of military affairs. Likewise, as it seeks to answer how the deep desert can best be used for military purposes, this study is pertinent to today's military operations, perhaps more so than at any time since World War II. "...this study provides fresh insights into the nature of desert warfare, past, present and future... [and] reveals the peculiarities of this warfare often lost to modern armies... a virtual primer, useful to commanders and soldiers alike. At long last this book can find its rightful place in the classroom of military courses and colleges and in the hands of those interested in the intricacies, complexities and problems of military operations in desert regions". From the Foreword to the book by Colonel (Retired) David M. Glantz. Longlisted for the 2002 Booker Prize: the compelling story of a relationship between a young white South African woman and a young Arab man The unforgettable and heartbreaking true story of the firemen who bravely fought "the perfect fire" is now in paperback. In v.1-8 the final number consists of the Commencement annual. Gene Wolfe may be the single best writer in fantasy and SF today. His quotes and reviews certainly support that contention, and so does his impressive short fiction oeuvre. Innocents Aboard gathers fantasy and horror stories from the last decade that have never before been in a Wolfe collection. Highlights from the twenty-two stories include "The Tree is my Hat," adventure and horror in the South Seas, "The Night Chough," a Long Sun story, "The Walking Sticks," a darkly humorous tale of a supernatural inheritance, and "Houston, 1943," lurid adventures in a

dream that has no end. This is fantastic fiction at its best. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Undersheriff Estelle Reyes-Guzman is always busy, but now more so than ever. The sheriff is still not completely recovered from his stay in the hospital, and she is recovering from a hospital stay herself. After a long day at work, Estelle is happy to clear off her desk and drive home where her beloved family waits. She hears her cell phone ringing as she pulls into the driveway. A truck has gone off the road and the driver's body found near the wreck. Back on the job, Estelle drives to the scene, where she finds more questions than answers. Was the truck's going over the hill really an accident? And why was there a single footprint on the man's body? An autopsy spurs further puzzles. The sixth in the Posadas County Mystery series.

As "the great storm" raged over the towns of Bootley and Sketchly (and beyond) causing widespread power cuts, meanwhile, at the same time, in the nearby village town of Lentley, amateur star-gazer Scavlon Connelly is recording on his home telescope what he feels is "a momentous event" in the skies up above. The earth is being viciously lashed with the ever-increasing thunder and electric lightning storms . . . far from the norm. Later that night, he is joined by close friend Tilley and his friend

Sarna. From that night on, the trio develops a strong, life-lasting bond, taking them out of obscurity and propelling them into a previously unimaginable fast-developing world of solar energy and science. The story runs over a period, where man has for now secured world peace with all his earth-bound enemies and is now governed by the world government . . . the United Nations of All States. A crumbling farmhouse in Puglia, Casa Rossa was bought by Alina Strada's grandfather at a time when no one else wanted it. Now busy preparing it for sale, Alina endeavors to recover the memories it still harbors—in particular of three women whose passions indelibly shaped her family's dark past. There's grandmother Renee, whose love of novelty won over everything else. Alina's mother, Alba, whose marriage to a screenwriter inspired both great art and unbearable sadness. Finally Isabella, Alina's sister, whose fervent politics drove her to ever-escalating betrayals. Moving from Jazz Age Paris to 1950s Rome to modern-day New York, but returning always to the uncompromising beauty of Italy's south, Casa Rossa is a spellbinding story of how loves and losses, secrets and lies, resonate across the generations.

to the voices behind radio for students and general readers alike. A simple mistake at an indoor climbing gym sentenced 28-year-old Robby to a year in a wheelchair, shattering his aspirations of becoming a mountaineer. In the months that followed, Robby faced depression, anxiety, suicidal thoughts and a complete loss of his sense of identity. But from somewhere deep inside him, he summoned up the strength to keep going even when all seemed lost; he embarked on a monumental journey, a feat of mental and physical strength. His weakness became his power. This story is more than a biography or an account of a mountaineering expedition – it showcases the human spirit and shows us all how it is possible to rewrite the definition of what is possible. From those dark days, Robby has become the embodiment of perseverance and possibility, overcoming the odds to join the handful of people who have summited Mount Everest.

U.S. Customs Special Agent Jimmy Maxwell has narcotics smuggler/trafficker Angel Garcia in his crosshairs. It is the late 1990's and being on the perilous front lines of the War on Drugs is not for the faint of heart. Angel Garcia is just one step away from an arrest, but the overload of drug-related smuggling cases flooding the Ports of Entry in the San Diego area is hampering Jimmy Maxwell's investigation. To top it all, Jimmy's home life is rapidly deteriorating. Jimmy thought that Angel's ex-wife might be able to help in his investigation, but when their unexpected attraction turns into something more, it puts his rocky marriage on a collision course with his professional life. As the pressures of job and personal life

reach boiling points, Jimmy finds that he is being forced to make choices that threaten to overwhelm his understanding of right and wrong.

Imagine a city of a half million people, an average American city where everyone is going about their daily routine. But unknown to them, something much larger is going on: the city is involved in a grand dance. Only one man can see it, but he's at a loss to explain what it is. That becomes the quest of David Peters. David Peters has been unemployed for months. The former brilliant marketing guy is caught in a relentless downward spiral. He's been wearing the same T-shirt for weeks, his lawn looks like a hayfield, the car is belching blue smoke, and his wife is ready to kill him. He's convinced the government is behind it all. Tired of pointless job interviews, David divides his time between coffee at a local diner and do-it-yourself science explorations. During one of these explorations David devises a new twist on time-lapse photography, revealing secret patterns of behavior in everyday life. He combines his time-lapse ingenuity with satellite images to uncover patterns on a grand scale. Now, if only someone would take him seriously. The government takes David quite seriously when they realize he has uncovered a human catastrophe they are desperately trying to hide. When his

wife becomes a victim herself, David's conspiracy theories become all too real. He seeks the advice of an expert, only to discover that he has tapped into a primal legacy, and the government wants a piece of it. At every turn the stakes get larger, until finally David finds himself at the crossroads of good and evil. Now his creativity and brilliance will be put to the ultimate test. The future of humanity is on the line. Paul Jennings, a Director of Employment at Memory Systems, a large international computer hardware corporation, works for a Lebanese-born Chief Executive Officer whom he admires. However, when the CEO hires his brother to manage an intern program filled with Middle Eastern candidates, he becomes uncomfortable with the secretive way it is allowed to operate. As more and more candidates arrive to the company's headquarters in Denver, Paul becomes suspicious that the program has ulterior motives. When he learns that someone has recently tampered with trade secret files and sees a trend of other disturbing business practices, all pointing to the CEO's newly hired brother, he calls on colleagues within the company as well as friends outside to help him explore his suspicions. They quickly find themselves searching a variety of international locations, where they not only uncover the evidence they seek but also discover a plot to commit the most horrific act of terror the world has seen since 9/11. Needing someone who has connections with Homeland Security, Paul reconnects with former love interest, Hannah Caitlyn Campbell, who not only helps him coordinate his efforts, but also forces him to reexamine

some of his basic tenets for living by using a line from a famous poem by Elizabeth Barrett Browning, concerning "plucking blackberries." Will Paul and his friends' efforts be in time or will they watch the face of world history change in one cataclysmic moment? More than 600 articles provide ample illustration of the role this medium plays throughout the world. From radio's invention to radio on the Internet, the cross-referenced and thoroughly indexed articles analyze over 100 years of topics, programs, issues, people, and places, and provide leads to further reading. Some 250 photographs "give visual context to an often unseen world." Scholars, old-time-radio admirers, and curious readers will appreciate the unparalleled comprehensiveness of this source."--"The Top 20 Reference Titles of the Year," American Libraries, May 2004. Peter Williams was still a young man when he first met the Great King. He enjoyed the King's company and often wanted to know more about him but never seemed to have the time. He always enjoyed talking to the King, who enjoyed his company and knew that Peter was one he could trust with any task he gave him. The Great King ruled over nearly all the lands on Earth. Strong and

powerful, he wanted only the best for his people, and they looked to him for just about everything. They had only to ask for help when they were in trouble and he would be there for them. And there came a time they needed him now. You might think that such a ruler would be loved by all. But unhappily no, not a bit of it! Many were ungrateful and, sad to say, said they didn't need a King to help them, thank you very much, they would do things their own way.
