Dr. Dana Suskind returns with a revelatory new  
look at the neuroscience of early childhood  
development—and how it can guide us toward a  
future in which every child has the  
opportunity to fulfill their potential. Her  
prescription for this more prosperous and  
equitable future, as clear as it is powerful,  
is more robust support for parents during the  
most critical years of their children's  
development. In her poignant new book, Parent  
Nation, written with award-winning science  
writer Lydia Denworth, Dr. Suskind helps  
parents recognize both their collective  
identity and their formidable power as  
custodians of our next generation. Weaving  
together the latest science on the developing  
brain with heart-breaking and relatable  
stories of families from all walks of life,  
Dr. Suskind shows that the status quo—scores  
of parents convinced they should be able to

shoulder the enormous responsibility of early childhood care and education on their own—is not only unsustainable, but deeply detrimental to the wellbeing of children, families, and society. Anyone looking for a blueprint for how to build a brighter future for our children will find one in Parent Nation. Informed by the science of foundational brain development as well as history, political science, and the lived experiences of families around the country, this book clearly outlines how society can and should help families meet the developmental needs of their children. Only then can we ensure that all children are able to enjoy the promise of their potential. Give your child a head-start in life! Provides new, relevant information relating to childhood learning Written in a clear, comprehensive manner with minimal jargon Addresses concerns that are foremost on new parents' minds Written by a ground-breaking neuroscientist and early childhood specialist. Given today's competitive society, it is no wonder that parents are pushing their children to be the best that they can be. However, going about this in the wrong way could be counter effective and have unfavourable effects on the child. This book explores parenting and learning myths and uncovers effective learning aids and techniques.

Written in an engaging and accessible manner, this updated and expanded edition of *Your Child, Your Genius*, first published in 1998) by neuroscientist Theva Nithy, shows how parents can:

- boost the power of their child's mind.
- nurture his/her interest in learning.
- enhance his/her memory.
- cultivate learning ability.
- increase their child's intelligence.
- boost his/her self confidence.

A graduate in neuroscience from the University of Toronto, Canada, Theva Nithy is the founder and neuroscience consultant at Smartbrain Mind Technologies, a centre that specializes in child and adult mind development. He has also designed a set of brain stimulation flash cards called the Earlystart System. Jeffrey Freed and Laurie Parsons provide an effective method for helping children with Attention Deficit Disorder excel in a classroom setting. In straightforward language, this book explains how to use the innovative "Learning Styles Inventory" to test for a right-brained learning style; help an ADD child master spelling—and build confidence—by committing complicated words to visual memory; tap an ADD kid's amazing speed-reading abilities by stressing sight recognition and scanning rather than phonics; access the child's capacity to solve math problems of increasing, often astonishing complexity—without pen or

paper; capitalize on the "writing and weaning" technique to help the child turn mental images into written words; and win over teachers and principals to the right-brained approach the ADD child thrives on. For parents who have longed to help their ADD child quickly and directly, Freed and Parsons's approach is nothing short of revolutionary. This is the first book to offer them reason for hope and a clear strategy for enabling their child to blossom. A parent's greatest desire is to raise a child who can face anything with wisdom and confidence. But in a world of over-extended schedules, amoral messages, and incessant peer-pressure, how can you raise a confident child that follows God's will, not the world's? Chip Ingram's practical tips for modeling right living, building strong bonds, and disciplining effectively will help parents bringing up Christ-centered kids who feel secure and significant no matter what comes their way. The book features practical, age-appropriate parenting tips, charts/diagrams, and action steps. A practical guide to help parents of babies and young children understand and develop their child's unique abilities, written by leading baby and childcare expert, Dr Miriam Stoppard. •Dr Stoppard explains how a young child achieves each milestone in development during a

relatively short period of 'total readiness'•Includes stage-by-stage guidance for parents on how to enhance natural development•Features ideas for games, activities and play that help children fulfil their potential – something every parent wants to ensure•Shows how parents can be their child's first teacher Elaine Halligan's My Child's Different: The lessons learned from one family's struggle to unlock their son's potential explores the enabling role that parents can play in getting the best out of children who are seen as 'different' or 'difficult'. Foreword by Dr Laura Markham. Society favours children, and adults, who conform. The notion that our children may be shunned for being 'different' breaks our hearts, but there is plenty we can do to help such children develop into thriving, resilient adults. In My Child's Different Elaine shares the true story of her son Sam, who by the age of seven had been excluded from three schools and was later labelled with a whole host of conditions ranging from autistic spectrum disorder (ASD) to pathological demand avoidance (PDA), before finally being diagnosed with dyslexia. He had become 'the Alphabet Kid'. His family never gave up on him, however Drawing lessons from Sam's transformational journey from difficult child

to budding entrepreneur, *My Child's Different* offers encouragement to parents who may be concerned about what the future might hold, and demonstrates how with the right support and positive parenting skills their children can grow up to surprise and delight them. The book chronicles Sam's journey from birth to adulthood, allowing readers to spot past and present patterns that may be comparable with their own children's experiences, and provides pragmatic parenting advice that will be of benefit to any parent whose children who may or may not have a diagnosed learning difficulty struggle with life educationally or socially. Elaine writes with warmth and compassion as she revisits the challenges faced, the obstacles overcome and the key interventions that helped instil in Sam a sense of self-belief, a drive to succeed and an emotional intelligence beyond his years. Interspersed throughout the narrative are the reflections and insights of parenting expert Melissa Hood, who illustrates the key concepts from Sam's story and shares practical positive parenting techniques to help parents better connect with their children. Also included are contributions from Sam himself providing an additional, uniquely rich perspective that will help deepen parents' understanding of their children's feelings and emotions.

Suitable for parents, educators and anyone who works with children, *My Child's Different* is a celebration of all the unique qualities that those who are different bring to society. This book helps parents understand their children's learning styles so they can encourage their kids to achieve their highest potential in school and life. "Various activities parents can use to discover their child's potential in science, technology, engineering, and math"-- This is the first comprehensive guide for parents of children with Dual and Multiple Exceptionality (DME, sometimes called Twice Exceptionality or 2E). Children with high learning potential may also have conditions such as ASD, ADHD, dyslexia and dyspraxia, having 'flashes of brilliance' in some areas whilst needing additional support in others. As a result, their abilities may not always be recognised in an educational setting. This book takes a strengths-based approach towards helping parents recognise and focus on their child's areas of potential to support them towards better attainment and self-esteem, and build on these abilities while also identifying and addressing areas of difficulty. It provides an understanding of the mixed learning profile of DME children, explaining why they excel in some areas but not others, as well as guidance for parents on

working positively with schools and providing their child with the support they need. With stories, quotes from parents and examples throughout, this is an essential guide to helping DME children achieve their full untapped potential. Tools to develop identity, purpose, biblical worldview, leadership, and communication skills. According to author Ilchi Lee, every child possesses a marvelously capable brain. Using its full capacity is simply a matter of accessing and supporting the rich potential that lies beneath the surface. In "Power Brain Kids," you will find a child-appropriate and parent-friendly guide to Lee's world-renowned Brain Education (BE) method. Each lesson focuses on a particular aspect of mental ability, including concentration, creativity, memory, and emotional control. Through the book, straight-A and struggling students alike will be challenged to apply full brain capacity toward the creation of a genuinely happy and successful life. "Power Brain Kids" features colorful design and full-color photography to help keep your child interested and involved with the lessons. Let our charming group of Power Brain youngsters demonstrate correct posture while your kids build flexibility and strength. In addition, the brain-building exercises and games will provide hours of

constructive fun for you and your child.

"Power Brain Kids" is perfect for any teacher or parent of children ages 6-12. In twelve simple lessons, help your child: \* Develop better concentration. \* Improve memory skills.

\* Gain tools for emotional self-control. \*

Activate creativity and imagination. \*

Establish connection between mind and body. \*

Cultivate confidence and self-discipline. 'Joy In Learning' is an educational philosophy we have been involved with for over 35 years in elementary education, pre-school, infant-

toddler, and Montessori. When social, physical, and emotional development is included in the educational process, children are going to thrive academically. And

understanding that they have an innate sense of curiosity & that they learn at their own pace, the hard but necessary 'work' of early learning isn't a chore but can be a 'Joy'.

This is a philosophy that doesn't require a totally new approach to education. Whether you are a parent, teacher, school administrator, or a home-school, if you understand the

importance of children exploring, interacting with, and making sense of the world around them, our 'Joy' philosophy, including our 5-Step Strategy, will enhance, not replace,

your educational efforts. Unlocking your child's potential. The opportunity to become a

parent is truly a gift. When we step into one of the most challenging and important roles we will ever play, we are provided with the opportunity to unwrap this precious gift and create an amazing adult. In a comprehensive reference manual, Dr. Shanon Gibson relies on her experience as a seasoned teacher, educational entrepreneur, and infant/toddler developmental specialist to share strategies and insight for parents, educators, counselors, and caregivers that encourage positive early childhood experiences and the development of a whole person to achieve ideal lifelong outcomes. Dr. Gibson provides valuable information on the latest research findings, the growth of a child's brain, developmental milestones related to a child's birth gender, and concrete methods to change negative behaviors, build resilience, limit screen time and technology, teach social skills, and much more. Additionally, Dr. Gibson defines sensory processing and the eight sensory systems to help caregivers understand the uniqueness of every child and then successfully parent around it. The Gift of Parenting is a compassionate guide to unwrapping a child's potential during early development to ensure the creation of a happy, productive adult. More children born today will survive to adulthood than at any time in

history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence. Unleash your child's true learning potential with this powerful and practical go-to guide. Learn how to supplement traditional teaching done at school with proven, easy to apply tips and strategies tuned to the specific ways your child learns and processes information. By following Pam's strategies, your child will find that learning is fun when it make sense. This guide is packed with over 14 years of hands-on experience. By adopting the strategies presented, you'll enjoy watching your child blossom into a confident, successful, and independent student. "Teachers hold the potential to provide a student with

frustration or opportunity every day—and those states are closer together than you might think.” When students repeatedly lose track of directions or take a long time to solve problems, it’s easy for teachers to see the distracted or off-task behavior, but not always to see the root of the problem. Quite often the same child who has an underdeveloped skill may have an opposing but hidden strength: a slow processor of information may also be a deep thinker. Teaching to Every Kid’s Potential is an invitation to teachers to improve the learning in their classrooms, one student at a time, using practical, evidence-based strategies. Focusing on four big concepts from neuroscience—flexibility, readiness, connection, and masking—the author shows how to apply them to build on the strengths of students. Each chapter unpacks the science; shows how talents can compensate for neural processing issues and suggests small but powerful adjustments to classroom practice that can allow kids’ gifts to emerge. Imagine if there was a way to prepare the environment around you to maximise every minute you spend with your children. Inspired by the Montessori method, this book enables parents to utilise the world around them to allow children to develop the essential skills for life; independence, responsibility and a

sense of wonder. Parents will soon see children growing towards their full potential. Compassionate, empathetic and independent learners who feel that they have the power to make a difference in the world - this is every parent's dream. Within this book are 100 ways you can establish healthy routines, great conversations and a home environment that will allow you to truly discover 'the potential in every child'. "Alison Gopnik, a ... developmental psychologist, [examines] the paradoxes of parenthood from a scientific perspective"-- Your child's achieving attitude begins with you. Teaching your child is important. Teaching your child to think is more important. Thinking is not information or knowledge or being right. Thinking is the skill which unlocks the potential within. It is the essential difference that separates winners and achievers from others. This book will help you - the caring parent - combine the unique knowledge of your child's personality with the latest research on how children learn at each age, to enable you help your child achieve his full potential. From infancy, pre-school and through school, at every stage, the book is designed to enhance your child's concentration skills, problem-solving abilities, creativity, and honest motivation - the complex dynamics which will

translate your child's potential into a brilliant legal mind, a gifted surgeon or a path-breaking physicist. Here at last is the long-awaited continuation of *The Religious Potential of the Child* (from 3 to 6 years old). In this book Sofia Cavalletti draws on her long experience with children from diverse cultures and environments to describe the vital religious needs of the older child (6 to 12 years old). The theme of the covenant between God and humankind, first revealed to Israel, is expanded to include all of history, from creation to the Parousia, the second coming of Christ. This book will be a great help to educators and catechists seeking to understand the characteristics of the older child, particularly the child's relationship with the mystery of God. There's nothing more frustrating than watching your bright, talented son or daughter struggle with everyday tasks like finishing homework, putting away toys, or following instructions at school. Your "smart but scattered" 4- to 13-year-old might also have trouble coping with disappointment or managing anger. Drs. Peg Dawson and Richard Guare have great news: there's a lot you can do to help. The latest research in child development shows that many kids who have the brain and heart to succeed lack or lag behind in crucial "executive

skills"--the fundamental habits of mind required for getting organized, staying focused, and controlling impulses and emotions. Learn easy-to-follow steps to identify your child's strengths and weaknesses, use activities and techniques proven to boost specific skills, and problem-solve daily routines. Helpful worksheets and forms can be downloaded and printed in a convenient 8 1/2" x 11" size. Small changes can add up to big improvements--this empowering book shows how. See also the authors' Smart but Scattered Teens and their self-help guide for adults. Plus, an academic planner for middle and high school students and related titles for professionals. In this quick and easy guide, parenting and child education expert Kia Haselrig-Oparah will show parents how to "Raise the Bar" in learning how to make the most out of their time teaching their children how to communicate effectively, learn basic verbal skills, reading strategies, and how to maximize their child's potential and desire for learning, all while having fun! Drawing from her professional experiences, working with children of varying ages and in different capacities for over 15 years, the author and parent also uses her own experiences with raising two children to share what worked for she and her husband, as well

as what to avoid. Offering no pressure, fun and engaging activities that are at no cost to you (only some time, patience, and perseverance), this book shares learn basic teaching skills and strategies to engage with your child, such as: -When and how to introduce your child to interact with and recognize their home environment -Helpful tips on teaching your child how to speak and read- The importance of expanding your child's vocabulary to the best of their abilities and beyond. You will be amazed at what your children are capable of learning. There are no limitations!-Teaching children how to communicate what they want, need, and how they feel-Increasing communication and decreasing frustration for you and your babyRemember: All children have their own unique abilities and talents and learn at their own pace. No need to compare children or learning deadlines. Let's raise the bar on learning and discover the art of unlocking your baby's potential Teaches parents how to evaluate and participate in their children's growth at each stage of development by charting and testing specific skills By exploring how visual problems develop, this comprehensive book shows how visual dysfunctions can be reversed through effective and efficient therapy, which will help children reach their full potential

and see the world clearly. Original. The 21st century is a challenging era and the competition is unyielding. As parents, we feel an urgency to prepare our children to face this world. We are constantly seeking the best schools, activities, and programs in the hope that they will give our children that extra leg-up in life. We believe that if we want our children to thrive in this world, we must prepare them with every resource available to us. In our eagerness to provide everything our children might need, we have lost sight of the basic fundamentals that they require to flourish. Like planning a house to weather the storm, we must ensure that our children's foundations are strong. However, in our haste to cover every avenue that promises an advantage, we have unwittingly compromised that foundation. It's time to review what is working and what isn't. Supported by case studies and scientific research findings, Brainchild provides keen insights on how to nurture children to reach their full potential. Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers

in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies

used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

This book describes the Catechesis of the Good Shepherd, a Montessori-based style of catechesis that focuses on the child's independent journey to God by working with materials in a specially prepared place called an atrium. Written by Sofia Cavaletti, the Italian scripture scholar who developed the Catechesis of the Good Shepherd, this classic work demonstrates the profound spiritual capabilities of children as brought forth through their engagement in the Catechesis of the Good Shepherd. This book is important for anyone desiring to learn about the Catechesis of the Good Shepherd or the spiritual life of children ages 3-6. Sofia Cavaletti is an

internationally known biblical scholar and was a member of the committee that prepared the Directory for Masses with Children. Together with her collaborator, Gianna Gobbi, a Montessori educator, she has traveled throughout the world forming catechists in this essentially oral method and helping to establish catechetical centers modeled on their Centro di Catechesi in Rome. A golden rule book to parenting best practices, *What Great Parents Do* concisely presents key strategies to help parents reshape kids' challenging behaviors, create strong family bonds, and guide children toward becoming happy, kind, responsible adults. *What Great Parents Do* is an everything-you-need-to-know road map for parenting that you will consult again and again. Psychologist Erica Reischer draws on research in child development and cognitive science to distill the best information about parenting today into bite-size pieces with real examples, useful tips, and tools and techniques that parents can apply right away. This book will show you how to do what great parents do so well, including:

- Great parents start with empathy
- Great parents accept their kids just as they are
- Great parents avoid power struggles
- Great parents see the goal of discipline as learning, not punishment
- Great parents know

they aren't perfect A toolbox of the most effective parenting strategies, What Great Parents Do is accessible, actionable, and easy to follow. Are you sick of nagging your child to write down homework assignments? Is his or her backpack a black hole that eats up papers, books, and gym clothes? Organizational skills problems aren't just frustrating--they get in the way of school success and wreak havoc at home. Fortunately, help is at hand. This unique resource stands out from other books because it is based on a scientifically tested program that works. Learn how you can teach your 7- to 13-year-old specific skills to:

- \*Organize school materials and toys.
- \*Track assignments.
- \*Improve time management and planning.
- \*Overcome brain "Glitches"--mischievous creatures that trip kids up.
- \*Create and follow effective routines.

Concrete examples, tips for strategically using praise and rewards, and practical tools (you can download and print additional copies as needed) help you implement each step of the program. Books Sold! A Positive Approach To Helping Children With Special Needs Realize Their Potential Every child deserves to lead a happy and fulfilling life. For parents and teachers of children with special needs, helping their child to not only negotiate daily challenges, but to live fulfilling, meaningful lives, can be the most difficult challenge they will face. Over the years, millions of parents and teachers have come to trust Jane Nelsen's classic Positive Discipline series for its consistent, commonsense approach to childrearing. Now, the bestselling series addresses the specific challenges that parents and teachers of children with special needs face, and offers them straightforward advice for supporting them in positive ways. In these pages are practical solutions to challenges such as: Learning to look beyond diagnostic labels ? Believing in each child's potential regardless of his/her stage of development ? Helping children integrate socially and interact with their peers ? Coping with the frustration that inevitably occurs when a child is being difficult ? Strengthening a child's sense of belonging and significance ? And Many More! Use this book to answer such questions as: • How do you accommodate a disability, while still teaching a child to try their best? • How do you help a child cope

with anger they may have trouble expressing, especially when that anger may on some level be justified? • How do you teach a child who may struggle with seemingly straight forward tasks to contribute to the world around them in a way that will be meaningful to them? “If you are raising or teaching a child with special needs, this book is a must-read. As the mother of a child with autism, my hopes and dreams for my son were no different than those of other parents. I wanted a parenting approach that helped my child grow up to be self confident, happy, and prepared for success in relationships, work, and life. I also needed practical, effective methods for addressing the significant, challenging behaviors I faced on a daily basis. Finally, in this amazing book, I found both....Thank you, thank you, thank you to the authors of this groundbreaking book.” - Rachel Fink Parks, MS, PCC

The Brain-Based Classroom translates findings from educational neuroscience into a new paradigm of practices suitable for any teacher. The human brain is a site of spectacular capacity for joy, motivation, and personal satisfaction, but how can educators harness its potential to help children reach truly fulfilling goals? Using this innovative collection of brain-centric strategies, teachers can transform their classrooms into

deep learning spaces that support their students through self-regulation and mindset shifts. These fresh insights will help teachers resolve classroom management issues, prevent crises and disruptive behaviors, and center social-emotional learning and restorative practices. WINNER! Mom's Choice Gold Award for parenting books -- Mom's Choice Awards: The best in family-friendly media "My kid is smart, but..." It takes more than school smarts to create a fulfilling life. In fact, many bright children face special challenges: Some are driven by perfectionism; Some are afraid of effort, because they're used to instant success; Some routinely butt heads with authority figures; Some struggle to get along with their peers; Some are outwardly successful but just don't feel good about themselves. This practical and compassionate book explains the reasons behind these struggles and offers parents do-able strategies to help children cope with feelings, embrace learning, and build satisfying relationships. Drawing from research as well as the authors' clinical experience, it focuses on the essential skills children need to make the most of their abilities and become capable, confident, and caring people. In this volume, leading researchers and implementation experts from an

array of disciplines provide evidence-based, cost-effective, and actionable strategies for delivering quality early childhood education (ECE) at scale in low- and middle-income countries (LMICS). Over the past decade, neuroscientists, developmental and cognitive psychologists, economists, and education researchers have amassed evidence to inform ECE program design. Yet much of this evidence has not been readily accessible to policymakers and practitioners, and potential synergies from cross-disciplinary considerations have not been realized. *Quality Early Learning: Nurturing Children's Potential* synthesizes the evidence across disciplines and charts a forward course for quality ECE. The volume includes *Overview, From Evidence to Effective Policies: How to Invest in Early Childhood Education to Nurture Children's Potential*, by Magdalena Bendini, Amanda E. Devercelli, Elaine Ding, Melissa Kelly, and Adelle Pushparatnam Chapter 1, *Learning in the Early Years*, by Elizabeth Spelke and Kristin Shutts Chapter 2, *Pedagogy and Curricula Content: Building Foundational Skills and Knowledge*, by David Whitebread and Yasmin Sitabkhan Chapter 3, *Building an Effective Early Childhood Education Workforce*, by Nirmala Rao, Emma Pearson, Benjamin Piper, and Carrie Lau Chapter 4, *Creating Early Childhood*

Education Environments That Promote Early Learning, by Cynthia Adlerstein and Alejandra Cortázar Chapter 5, The Role of Management, Leadership, and Monitoring in Producing Quality Learning Outcomes in Early Childhood Education, by Iram Siraj, Violeta Arancibia, and Juan Barón Chapter 6, Toward Quality Early Learning: Systems for Success, by Sharon Lynn Kagan and Caitlin M. Dermody In the volume, the authors provide the latest evidence on how young children learn most effectively and how ECE programs can foster children's natural ability and motivation to learn. It offers guidance for policy makers on policy design and implementation including what elements of ECE to prioritize in resource- and capacity-constrained settings in LMICs. Secret Keys, a multi-cultural storybook, contains new stories that instill positive values and success principles in young children. Each author writes with the unique perspective of his or her ethnic background, and every page opening features beautiful new color illustrations. From the lives of well-known people, Bible characters, and children like themselves, young readers will discover the secret keys to successful happy living. Keys such as responsibility, commitment, kindness, and integrity open to them lifes richest reward. At the end of each chapter children

will find a "key box" that helps them understand and use the secret key with thought-provoking questions and practical applications. Three activity sections reinforce the lessons learned in Secret Keys and provide hours of enjoyment with family and friends. This is a practical child development book that contains a range of simple home tests that parents can perform to assure themselves of their child's normal development. The book offers advice on what steps to take if the results are not what you expected. It also shows the role played by parents in their child's emotional and intellectual development and aims to help parents meet this challenge with confidence. Giftedness can be a blessing or a struggle. The stimulation of the senses is different in a gifted child. They experience life, impulses and emotions differently. But there are ways to play into those talents and provoke curiosity and fascination in preschoolers and older children. This book covers some of those suggestions. Sometimes, parents think high grades is a good thing, and it can be. But did you know that this is not always the case? Did you know that some gifted children actually underachieve for various reasons? And then comes the big question: Should you tell a child that he or she is gifted? What are the

pros and cons of doing so? Don't remain in the dark. The achievements of gifted students are the consequences of their psyche, but it's a vulnerable process to stimulate that intelligence in the right way. To do so, this book can help you along the way. Do yourself a favor and learn more about these things now.
