What makes Apostolic Pentecostals...Apostolic? What separates them from "mainstream" Christianity? Is it their belief in only one true God, revealed in the person of Jesus Christ? Is it their insistence on the Bible as the ultimate authority? Is it because they insist that being "born again" is more than a profession of faith? In this book the author provides an introduction to five key doctrines from a distinctly Apostolic perspective: God, Faith, Repentance, Water Baptism and the Gift of the Holy Ghost. For many years, Apostolic churches have lagged in growth and efficiency. Why? Because they have been using the Protestant model of church administration, instead of the Apostolic model taught in the New Testament. It's like trying to drive a car with several important engine parts missing: You might get it to move, but it will never do what it was originally intended to do. This book shows the errors of trying to build an Apostolic church using a Protestant model, and demonstrates the original Apostolic model, explaining how and why it works. An important tool for all Apostolic Pentecostal ministers. Excerpt from *Church Polity: Or, What Is an Apostolic Church?*; A Semi-Centennial Discourse, Delivered May 12, 1875, Before the Rhode Island Baptist State Convention The nineteenth century presents to the world the spectacle of church government in three forms. Borrowing from the vocabulary of the state, we may call them the monarchical, the aristocratic, and the democratic or republican. The Episcopal form of government is monarchical, specimens of which may be seen in the Roman Catholic Church, the Greek Church, the Church of England, and modified by union with an aristocratic element, in the Protestant Episcopal Church of the United States and the Methodist Episcopal Church. The Presbyterian form of government is

aristocratic, softened by some infusion of the popular element. The popular form is represented in the Congregationalists, the Wesleyan Methodists, and the Baptists - most thoroughly by the Baptists. These existing forms of church government is what we mean by the church polity of the nineteenth century. New Testament church polity covers only the apostolic period, and by this the church polity of the nineteenth century, and of all the intervening centuries, must be tried. What I propose to do, then, is this: to break whatever connection may be alleged to exist between the church polity of the present and the church polity of the apostolic age, and thus avoid transferring to the first century what we see in the nineteenth. To this method there ought to be no objection. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. The Catholic Apostolic Church, commonly though erroneously called Irvingites, was an extraordinary nineteenth-century religious movement arising out of the political and social upheaval wrought by the French Revolution. Although a number of studies have appeared in the past few decades, Seraphim Newman-Norton's *The Time of Silence* is unique in providing a detailed and sympathetic account of the events following the death of its last apostle, Francis Valentine Woodhouse, in 1901 through to the death of the last priest in 1971. Originally published in a very limited edition in 1974, this fourth edition is extensively revised and provided with historic illustrations. Church planting is not just about gathering new communities of people who are already Christians. Planting churches flows naturally out of making disciples. In this concise guide, pastor J. D. Payne explains the process and stages of church planting, with biblical foundations and practical steps for planting teams both domestically and internationally. "Kenneth Whitehead shows in this book how, according to these same sources, the early Church was already in all essential respects the same Church as the Catholic Church of today. The Church consists of believers in Christ who profess her creed and are subject to the authority of her hierarchy, just as the first Christians accepted the preaching of the apostles chosen by Jesus and were subject to their authority (as can abundantly be seen in the Acts of the Apostles). The Church of Christ purveys both word and sacrament for the sake of the sanctification and salvation of her members through the ministry of ordained priests and bishops, all of whom are ultimately under the authority of the bishop of Rome, the Pope. All these things were also strictly true of "the early Church" - as demonstrated in this book."--BOOK JACKET. This volume offers patristic comment on the second half of the third article of the Nicene Creed. Readers will gain insight into the history and substance of what the early church believed about the nature of the church and the consummation of all things. A historical study of the adoption by Christianity of Jewish prerogatives and attributes. This book explores biblical values that critique the ecclesiology of the New Apostolic Reformation Church (NARC) and compares the ecclesiology to other missional movements in the North American context. A biblical exegesis of Ephesians 4:11-13 as well as C. Peter Wagner's conceptualization of an apostle and apostolic ministry allow the author to demonstrate the gap between the biblical perspective and Wagner's concept of an apostle. The biblical role of an apostle is to make the church missional by emphasizing the concept of sending, whereas Wagner sees the apostle as a church leader. Based upon interviews and participant observation in three NARCs, SuYeon Yoon describes the leadership and ecclesiology based on their own self-descriptions. This book then demonstrates the gap between the biblical and conceptual ideals and the reality of ecclesial practice. The author argues that the NARC serves as a charismatic manifestation of a similar cultural response to establish a relational structure for church communities that can appropriately reflect upon and identify with the contemporary context. This implies that each movement needs to be biblically sound, faithful to its conceptualization, and relevant to the context in order to cultivate its own way of being the church.

From generation to generation and season to season, the Lord rebuilds His Church, so His Kingdom can be better manifested in the earth. Wales has been called the land of revival because at least fifteen outstanding revivals in Wales from 1762-1862 resulted in spiritual awakening. These, in turn, resulted in increased church attendance and moral improvement. In addition, 2016 marked the 100th anniversary of the Apostolic Church in the UK. This book will enthuse a new generation of revivalists with the story of the mighty Spirit-led growth of the Apostolic Church in the South Wales Valleys. The writings in this volume cast a glimmer of light upon the emerging traditions and organization of the infant church, during an otherwise little-known period of its development. A selection of letters and small-scale theological treatises from a group known as the Apostolic Fathers, several of whom were probably disciples of the Apostles, they provide a first-hand account of the early Church and outline a form of early Christianity still drawing on the theology and traditions of its parent religion, Judaism. Included here are the first Epistle of Bishop Clement of Rome, an impassioned plea for harmony; The Epistle of Polycarp; The Epistle of Barnabas; The Didache; and the Seven Epistles written by Ignatius of Antioch - among them his moving appeal to the Romans that they grant him a martyr's death.
