This open access book presents

a methodology for the assessment of structural building details, taking into account the contemporary guidelines for earthquake-resistant and energy-efficient buildings. A review of structural details for energy-efficient buildings revealed that in some cases the structural system is interrupted, leading to solutions which are not suitable for earthquake-prone regions. Such typical examples would be the use of thermal insulation under the building foundation and reduction of the load-bearing elements' dimensions - also at the potential locations of plastic hinges which are crucial for the dissipation of seismic energy. The proposed methodology of assessment favours a collaboration of architects, engineers, contractors and investors in the early stage of building design. By this the methodology enables efficient decision-making and contributes to a selection of optimal building structural details. The book starts by presenting the typical structural details of the thermal envelope of

energy-efficient buildings together with the scientific background required for understanding the process of detail development from all the relevant aspects. Over 20 examples of most frequent details are described and analysed to raise awareness of the importance of earthquake resistance, sustainability, energy-efficiency and thermal comfort for users. (John Williams Signature Edition - Strings). John Williams won his first Oscar for his scoring and adaptation of Jerry Bock's original music for *Fiddler on the Roof*. Here is the music he wrote for the opening credits and establishing scenes, performed on the 1971 soundtrack by Isaac Stern. Music in film is often dismissed as having little cultural significance. While Hammer Film Productions is famous for such classic films as *Dracula* and *The Curse of Frankenstein*, few observers have noted the innovative music that Hammer distinctively incorporated into its horror films. This book tells how Hammer commissioned composers at the cutting edge of

European musical modernism to write their movie scores, introducing the avant-garde into popular culture via the enormously successful venue of horror film. Each chapter addresses a specific category of the avant-garde musical movement. According to these categories, chapters elaborate upon the visionary composers who made the horror film soundtrack a melting pot of opposing musical cultures. Designed in 1908 as a suburban residence for a Chicago businessman, the Robie House embodied the full spirit of Frank Lloyd Wright's pioneering "prairie school" of design. Today, this masterpiece of modern architecture remains a classic example of the builder's ideas and ideals. Long, low, streamlined and exemplary of the prairie's spaciousness, the Robie House profoundly influenced the course of American architecture — so much so that a model of Wright's innovative structure has long been on display at the Museum of Modern Art in Manhattan. Now model builders as well as lovers of fine

architecture can construct an accurate three-dimensional model of the Robie House, and thereby discover for themselves the harmonious interrelationships of parts and numerous other design details that make this home a world-famous architectural masterpiece. Printed in full color on sturdy card stock, the model comes complete with step-by-step instructions and exploded diagrams. A series of multi-level horizontal planes includes balconies, platforms, a porch and entrance court, while easy-to-follow directions clearly explain how to cut, fold and glue walls, doorways, windows, roof and other features. Students of architecture, miniaturists and paper engineers will delight in recreating an outstanding example of American residential architecture, which, in Wright's own words, has become "a source of worldwide inspiration." "It wasn't a team. It was a tent revival." So says Pat Summitt, the legendary coach whose Tennessee Lady Vols entered the 1997-98 season aiming for an almost unprecedented "three-peat" of NCAA

championships. Raise the Roof takes you right inside the locker room of her amazing team, whose inspired mixture of gifted freshmen and seasoned stars produced a standard of play that would change the game of women's basketball forever. The 1997-98 season started innocently enough. One Saturday in August, four young freshmen--Semeka Randall, Tamika Catchings, Ace Clement and Teresa Geter--arrived on the Tennessee campus to begin their college careers. Welcoming them were a number of players from the previous year, including Chamique Holdsclaw and Kellie Jolly. But that night, in a sign of things to come, a simple pickup game turned into an amazing display of basketball brilliance--freshmen against established players, and with barely a shot missed by either side. Suddenly Pat Summitt glimpsed the future: fast, aggressive and hugely talented. This might be the team she'd worked her whole career to coach. As the season got under way, other dramas unfolded. After one

emotional team meeting, Summitt realized that many on the team were playing for something more than just the glory of the game: all four freshmen, for example, came from single-parent homes, and the tough circumstances of the majority of the other players seemed to add an extra edge to their desire to win it all. Further, Chamique Holdsclaw, widely regarded as the greatest female player ever, was being dogged by questions about turning pro--and she seemed reluctant to rule it out. Meanwhile, another member of the team began to notice the unwelcome attentions of a fan, who soon turned out to be a full-fledged stalker. All this was behind the scenes; out on the court, the win column was swelling with every game: 8-0, 15-0, 21-0. As 1997 turned into 1998, Pat Summitt began privately to admit that this team had changed her: these kids were so lovable, funny and eager to please that she simply had to let them into her heart. Along the way, the Lady Vols were redefining what women were capable

of, trading in old definitions of femininity for new ones--in short, they were keeping score. And by the time they entered the NCAA Final Four tournament in Kansas City, Summitt found herself believing the impossible: despite all the distractions, the 1997-98 Lady Vols could go undefeated, and, in doing so, raise the roof off the sport of women's basketball. Packed with the excitement of a season on the brink of perfection and filled with the comedy and tragedy of one year in the life of a basketball team, Raise the Roof will have readers cheering from the bench for a team of all-conquering players and their astonishing coach. Charming toy village specially designed for youngsters ages 4 to 10 comes complete with two houses, church, schoolhouse, firehouse, general store. Step-by-step directions and easy-to-follow exploded diagrams enable children old enough to use scissors to construct schoolhouse, homes, church, firehouse other typical buildings of small American town. Containing papers presented at

the 9th International Conference on Sustainable Development and Planning this volume brings together the work of academics, policy makers, practitioners and other international stakeholders and discusses new academic findings and their application in planning and development strategies, assessment tools and decision making processes. Problems related to development and planning are present in all areas and regions of the world. Accelerated urbanisation has resulted in both the deterioration of the environment and quality of life. Taking into consideration the interaction between different regions and developing new methodologies for monitoring, planning and implementation, new strategies can offer solutions mitigating environmental pollution and non-sustainable use of available resources. Energy saving and eco-friendly buildings have become an important part of modern day progress with emphasis on resource optimisation. Planning is a key part in ensuring

that these solutions along with new materials and processes are efficiently incorporated. Planners, environmentalists, architects, engineers and economists have to work collectively to ensure that present and future needs are met. The papers in the book cover a number of topics, including: City planning; Regional planning; Rural developments; Sustainability and the built environment; Sustainability supply chain; Resilience; Environmental management; Energy resources; Cultural heritage; Quality of life; Sustainable solutions in emerging countries; Sustainable tourism; Learning from nature; Transportation; Social and political issues; Community planning; UN Sustainable Development Goals and Timber Structures. 12 songs from the classic musical recently revived on Broadway: Anatevka \* Do You Love Me? \* Far from the Home I Love \* Fiddler on the Roof \* If I Were a Rich Man \* Matchmaker \* Miracle of Miracles \* Now I Have Everything \* Sabbath Prayer \* Sunrise, Sunset \*

Of all the characters in modern Jewish fiction, the most beloved is Tevye, the compassionate, irrepressible, Bible-quoting dairyman from Anatevka, who has been immortalized in the writings of Sholem Aleichem and in acclaimed and award-winning theatrical and film adaptations. And no Yiddish writer was more beloved than Tevye's creator, Sholem Rabinovich (1859-1916), the "Jewish Mark Twain," who wrote under the pen name of Sholem Aleichem. Beautifully translated by Hillel Halkin, here is Sholem Aleichem's heartwarming and poignant account of Tevye and his daughters, together with the "Railroad Stories,"

twenty-one tales that examine human nature and modernity as they are perceived by men and women riding the trains from shtetl to shtetl.
